Education

University of British Columbia, BC, Canada - 4th Year Standing

Expected Graduation: May 2028

- ❖ Bachelor of Science in Computer Science
- ❖ GPA: 4.30/4.33 (Major GPA: 89%)

Technical Skills

- ❖ **Programming:** Java, JavaScript, TypeScript, Python, C++, HTML/CSS, R, GML
- ❖ **Framework:** React.js, Node.js, Next.js, Tailwind CSS, NoSQL, Three.js, Django, PostgreSQL
- ❖ **Tools:** GitHub, NPM, VS Code, IntelliJ, Firebase, RESTful APIs, JIRA, Slack, Claude Code

Work Experience

Surrey Food Bank | Surrey, BC | Full Stack Developer

Jan-Apr 2026

- ❖ **Technology:** React.js, Django, PostgreSQL, Tailwind CSS, JIRA, Slack
- ❖ Architected and implemented a full-stack appointment booking system with a React frontend and Django/PostgreSQL backend, supporting automated timeslot generation from admin-defined booking windows with configurable 15 and 30-minute durations
- ❖ Built a client intake questionnaire system with a dedicated REST endpoint storing JSON responses, gating booking page access behind a completion check enforced across both frontend UI and backend model flags
- ❖ Independently designed and delivered the Tiny Bundles program feature end-to-end — extending the booking window, appointment, and questionnaire models to support pregnancy-specific Wednesday booking slots, integrated into the existing frontend questionnaire flow
- ❖ Managed feature delivery through weekly PUM meetings, coordinating with teammates via JIRA and Slack to align on modular task ownership across an agile development cycle

ZenNyxAI Inc. | Vancouver, BC | Web Feature Engineer

May-Sep 2025

- ❖ **Technology:** JavaScript, React.js, React-Konva, Marked.js, jsPDF, KaTeX, OpenAI
- ❖ Served as a prompt engineering developer, designing and delivering a core MindMap feature for EasyNoteAI that converts AI-generated Markdown into interactive, editable node-graph visualizations via React-Konva
- ❖ Engineered a Markdown parsing and rendering pipeline using Marked.js and KaTeX to accurately translate structured AI notes into dynamic tree graphs with real-time node add, delete, modify, and undo operations
- ❖ Worked within an agile team of 3 through modular task decomposition, ensuring independently implementable features and smooth cross-module integration; delivered under supervision and slated for product release
- ❖ Implemented multi-format export functionality supporting PNG, SVG, and PDF outputs via jsPDF and react-konva-to-svg, directly addressing key user pain points from competitor analysis

Technical Projects

39WithYou | AI-powered chatbot with animated 3D Model (Personal)

Jul-Aug 2025

- ❖ **Technology:** TypeScript, React.js, Node.js, Tailwind CSS, Three.js, Claude API (Chutes.ai), TTS Models
- ❖ Built an interactive chatbot system combining an LLM inference backend (Claude 3.5 Sonnet) with locally run text-to-speech models for real-time, responsive voice interaction
- ❖ Implemented modular prompt-response pipeline to separate conversational AI responses from frontend animations, ensuring flexible expansion to new AI models or features
- ❖ Integrated an animated 3D character model with dynamic gesture mapping synchronized to conversation flow, enhancing user engagement

VoiceBase | Synthetic Voice Library Creation Webtool (Hackathon)

Oct 2024

- ❖ **Technology:** JavaScript, React.js, Spring Boot, Node.js, Tailwind CSS, Git
- ❖ Developed a full stack tool in a team of 4 to help users generate custom voicebanks for voice synthesis
- ❖ Front-end team lead in charge of team code review as well as mentoring peers with learning frameworks
- ❖ Coded core functions involving voice recording, document management, and downloads with [React.js](#)

Achievements

- ❖ UBC Biztech Hellohacks Hackathon - 2nd Place
- ❖ UBC Dean's List - Faculty of Science

Oct 2024

Sep 2023-May 2026
